PROFESSIONAL SUMMARY

Backend developer with hands-on experience building and deploying production-ready backend systems using Python, Django, and Django REST Framework. I have developed real-world applications including AI-powered platforms and secure payment systems using Stripe with webhook automation. Strong in designing scalable APIs, optimizing databases, and handling asynchronous tasks using Celery and Redis. Comfortable working with cloud and VPS deployments. I focus on writing clean, maintainable code and continuously improving through real-world problem solving.

TECHNICAL SKILLS

Backend Development

- Proficient in Python with strong expertise in Django and Django REST Framework (DRF) for building scalable APIs and web applications.
- Experienced in MySQL and PostgreSQL, including database schema design, optimization, and query tuning.
- Skilled in handling background tasks and scheduled jobs using Celery with Redis as a message broker.
- Expert in architecting payment systems with multiple gateways—including Stripe, Google Pay, and Apple Pay—utilizing Webhooks for real-time transaction verification, automated status updates, and complex subscription lifecycle management.

Deployment & DevOps

- Hands-on experience deploying applications on VPS hosting (Scala Hosting, Hostinger etc.) and AWS (EC2, instance, S3)
- Familiar with Docker for containerization and scalable application deployment.
- Strong understanding of server management, environment setup, and production hosting.

Frontend (Basic)

- Working knowledge of HTML, CSS, Tailwind CSS, and JavaScript for minimal UI tasks and API integration.

Other Tools

- Expert in Git workflows, including branching, merging, and collaborative development in shared repositories on both GitHub and GitLab
- Experienced with Postman for API testing and debugging.
- Comfortable with VS Code and agile development practices.

Problem Solving

- Strong problem-solving mindset with experience in data structures, algorithms, and coding challenges.

WORK EXPERIENCE

Junior Backend Developer

Join Venture AI, Mohakhali, Dhaka **June 2025 – Present**

- Team Leadership: Serving as a Co-Lead for a development team of 13 engineers, coordinating workflows, and ensuring high-quality output across projects.
- Strategic Planning & Architecture: Lead the backend design phase by architecting the complete project workflow and structural foundation before implementation.
- Cross-Functional Collaboration: Facilitate communication between UI/UX designers and the backend team to ensure frontend requirements align perfectly with backend data structures.
- Client Engagement & Stakeholder Management: Act as the primary technical point of contact for clients, conducting regular progress meetings to translate complex technical milestones into clear, actionable updates.
- Quality Assurance & Testing: Rigorously test and validate all RESTful API endpoints using Postman, ensuring data integrity, optimized response times, and error-free integration.
- Infrastructure & DevOps: Oversee the end-to-end deployment lifecycle, configuring production servers (VPS/AWS) and managing environment setups to ensure 99.9% application uptime.

PROJECTS

Voice Mind (Mobile App) | Django REST Framework, PostgreSQL, AI Integration, Google Play Billing

Live: https://play.google.com/store/apps/details?id=com.voicemind.app

- Developed backend system for an AI-powered mental wellness mobile application with 1K+ downloads
- Designed and maintained RESTful APIs supporting real-time AI chat, voice journaling, and emotional analysis
- Implemented subscription-based access using Google Play Billing (Google Pay) with secure backend validation
- Built AI-driven features including journaling summaries, emotional insights, and voice interaction processing
- Developed scalable backend to handle user-generated content (text, voice, and media)
- Ensured secure data handling and user privacy with encrypted communication
- Delivered personalized features including mindfulness tools, guided content, and user-specific recommendations

Emothrive | Django REST Framework, PostgreSQL, Stripe, Celery, Redis

Live: emothrive.net

- Built a production-ready mental wellness platform with scalable REST APIs
- Implemented secure authentication (Google OAuth, email verification)
- Integrated Stripe payment system with subscription lifecycle and webhook automation
- Developed AI-powered chatbot along with task and reminder features
- Designed and deployed backend architecture on production environment

OP Mental Health | Django REST Framework, PostgreSQL, Stripe

Live: optimalperformanceai.com

- Developed backend system for AI-driven mental health platform with 4 specialized chatbots
- Implemented secure authentication and payment integration
- Designed scalable API architecture to support multiple chatbot workflows

Inventory & Sales Management System | Django, Django Admin, PostgreSQL

Live: Zahid123.pythonanywhere.com

- Developed a fully customized Django Admin panel to manage sales, inventory, customer data, and financial records
- Designed centralized system for tracking stock levels, transactions, and customer balances
- Built automated reporting features for sales insights and inventory monitoring
- Customized Django Admin interface with advanced filters, search, and role-based data control
- Optimized database structure for efficient data handling and real-time updates

Shyvt Coach (AI Platform) | Django REST Framework, PostgreSQL, AI Integration, ElevenLabs API, AWS (EC2, S3)

- Developed backend for an AI-driven coaching platform featuring multiple specialized chatbot models
- Designed RESTful APIs to support real-time AI conversations and user interaction workflows
- Integrated multiple AI models to deliver personalized guidance and performance insights
- Implemented voice interaction using ElevenLabs API for real-time AI calling and speech generation
- Deployed application on AWS EC2 and utilized S3 for scalable file and media storage
- Built scalable backend architecture to handle concurrent chatbot sessions and user requests
- Managed user sessions, data processing, and response handling for seamless conversational experience

EDUCATION

BSc in Information Technology

University of Information Technology & Sciences (UITS), Baridhara J Block, Dhaka
Graduated: 2021 – 2025
Grade: 3.70

Higher Secondary Certificate

Shahid Smriti Degree College, Barisal
2017 – 2018

Secondary School Certificate

Nanduher Iluher United Institution, Barisal
2015 – 2016

Certifications / Training

Full Stack Web Development (Python, Django, React) — Ostad

- Completed hands-on training covering backend development with Django & DRF and frontend fundamentals with React
- Gained practical experience in building RESTful APIs, authentication systems, and full-stack applications
- Worked with database design, API integration, and modern development workflows

Extracurricular Engagements:

• **Treasurer**, UITS IT Club — Managed financial operations and event budgeting

• **Executive**, Software Development & Project Management Wing — Contributed to organizing technical events and team-based projects

• **Executive**, BASIS Students' Forum (UITS Chapter) — Participated in tech community activities and student engagement initiatives
